**RE: *Minor Amendment Application for 2025 Site Improvements Plan for ALPR at  
21000 E 13<sup>th</sup> Ave., Aurora, CO 80018***

Dear Reviewer:

The purpose of this letter is to explain the scope of work included in this amendment. The client is looking to upgrade the existing Automatic License Plate Reader system on site. This upgrade includes adding new raised curb islands within the guard shack inbound lanes for the license plate readers, removal/regrading/replacement of concrete pavements (<1,000 SY), and installation of new electrical conduits. Electrical conduits to be installed and existing low voltage electrical cable is to be run to an existing panel. No additional power source or panels are proposed as part of this project. Per the design, no changes will be made to any existing drainage patterns or impervious area counts. Along with this, the inbound and outbound truck lanes will be restriped within the disturbed areas.

Sincerely,

**Andrew Obrzut**
