RE: 14012 E Tufts Dr RSN 1708251

To Whom it may concern,

Sturgeon Electric will be installing the infrastructure to add two EV chargers in the parking area south of the facility, as noted on the submitted plans. Sturgeon's scope includes installing Utility meter housing, Utility CT cabinet, low volt panel, pipe and wire. The Chargers will be installed by a 3<sup>rd</sup> party, not Sturgeon Electric. We serve as a subcontractor for XCEL Energy on this project.

Please feel free to contact me with any questions,

## **Rodman Riehl**
