RE: CP RSN 1791180; Tesla's proposed EV charging station at 2767 South Parker Road.

Below is a clarification letter stating what corrections were made to the revised construction documents due to the following comments received:

Review Number – CP RSN 1791180:

Civil Engineering:

Adjust ADA stall to provide a clear pathway.

Response:

We have relocated the charge post to the other side of the stall to avoid obstruction of the pathway.

Additional Comments:

We have added (3) lights to the site to provide adequate lighting to the site.

Sincerely,

Brian Guthridge
Project Manager
