

FORM B – MP NARRATIVE

Form B: MP Narrative

1. General Description of the MP

Briefly describe the general character of your proposed MP. What will be the predominant land uses? What market segment is the proposed development designed to serve?

In 2008 a 2,500 Ac. Master Plan (MP), formerly Framework Development Plan (FDP), for Green Valley Ranch was approved. This MP included a variety of uses including residential, commercial, mixed use and a variety of parks and open space throughout. The MP was amended for 588 acres west of E-470 known as Amendment 1 and received approval in 2018. Amendment 1 modified planning areas and open space for the 588-acre area, however, there were no other changes made to the MP. The second amendment proposes to modify the 301 acres North and east of 52nd Ave. The Master Plan area is also being revised to remove all the area from the original MP approval located east of E-470.

The proposed Green Valley Ranch MP Amendment is to revise the land uses for the 301 acres north and east of 52nd Avenue, update land use maps to better align with current site plans, to remove the area east of E-470 from the MP and amend the property boundary due to E-470 purchasing a portion of the property. The proposed amendment also includes the addition of Urban Design and Landscape and Architectural Standards for Commercial/Retail uses.

We are also proposing a rezone with this Green Valley Ranch MP amendment for parcels located north of 52nd Avenue between, Picadilly Road to the CIG Gas Easement east of Tibet Road. The site is bordered by MU-A (Mixed Use-Airport) to the north, R-2 (Medium Density Residential) to the south, MU-R (Mixed Use-Regional) to the east (of E-470). The Active Adult neighborhood located between 48th Ave and 52nd Ave between Picadilly Road and E Tibet Road will be expanded to the north. This community is focused on the 55+ age group, while residential uses south of 48th Ave are focused on all age groups. Adjacent to 56th Avenue and East of Picadilly Road the land uses will be commercial/retail uses to serve this community and other surrounding communities near E-470.

2. Defining Character of the MP

Describe how your proposed MP will create a unique community with a definable character and special "sense of place". What facilities, amenities and special design features will set it apart in the marketplace from similar developments in your

area?

Green Valley Ranch MP will be a unified community following the “Colorado” theme. This theme reflects the beauty of the Colorado foothills landscape and will have a more rustic character. Predominant architectural styles will include Classic, Contemporary, Homestead, and Victorian with materials complementing the surrounding area.

The architecture is not defined by neighborhood, but rather by a mix of product types. The residential areas throughout the development consist of a variety of housing types: single-family detached homes, motorcourts with single-family detached, front loaded single-family attached duplex homes, and may include Single-Family Attached and multifamily homes within the mixed-use planning areas. These varying styles create diverse neighborhoods in both style and affordability. The primary landscape theme consists of large sweeping native areas that use landforms and native plantings indicative of the Colorado foothills. Large planting beds located along streets and trails will be made up of masses of grasses, shrubs, and trees to provide both seasonal interest and views into and out of the site. Landforms will be accentuated with the use of berming and rock outcroppings to create spaces for both wildlife and residents to enjoy.

The commercial planning areas will include a variety of land uses, including office, institutional and retail. A component of the commercial development is a Main Street per the Mixed-Use Regional District (MU-R) Aurora standards. These main street standards are further described in Tab 10. Due to close proximity to E470 and the interchange at 56th, the commercial center is positioned to attract a variety of commercial uses which may include large scale retail, office or warehouse retail. Commercial uses may include retail shops, restaurants, pedestrian spaces, and outdoor plazas. The vision for Main Street will be to create a high-quality public space for the Green Valley Ranch community. The commercial planning areas and Main Street will reflect the community ‘Colorado’ theme through architecture, signage, urban spaces, and site furnishings.

3. Zoning Conformance

Does the MP accurately reflect adopted zone district boundaries?

The Green Valley Ranch MP Amendment area is located within R-2, MU-A and MU-R zone districts. R-2 is located from 54th Avenue to 38th Avenue to the south, and from Picadilly Road to E470 to the east. The Mixed Use Airport (MU-A) and Mixed Use Regional District(MU-R) is located between 54th

Avenue and 56th avenue, and from Picadilly Road to E-470 to the east. A Zone Map Amendment is concurrently being proposed with this MP Amendment to rezone 78.8 Acres of MU-A north of 52nd Ave to R-2 zone designation in order to extend the active adult community. We're also proposing to rezone 28.3 Acres of the current MU-R east of Tibet Road to MU-A. Refer to the Rezone exhibits that are provided as part of that submittal.

4. Potential Regulatory Conflicts

Are there any existing or potential conflicts between MP design ordinance requirements and the terms of any existing annexation agreements or agreements with other jurisdictions or interest groups? If so what are they and how you propose to resolve them?

The Original Annexation Agreements include the following park and school dedication requirements:

Public Land Dedication - 6% of the area zoned for residential uses to be used for open space, and 2% of the area zoned for non-residential uses to be used for municipal purposes including fire facilities. School site dedications- up to 4% of the area zoned for residential uses. The following dedications were provided in Amendment 1:

Public Facilities

2% of non-residential acreage ($149.7 \times 2\% = 3.0 \text{ Ac}$)

- Land dedicated to city for future fire station along 48th Ave.

Schools

P-8 School:

614 Elementary School Students (.0175 acres/child) = 10.75 ac

289 Middle School Students (.025 acres/child) = 7.23 ac

Subtotal: 17.98 ac

- Amendment 1 included an 18.0 Ac school site
- Additional School dedication requirements will be met for all residential uses once future site plans exceed the original dedications.

High School:

361 High School Students (.032 acres/child) = 11.565 ac

Total Acres Required = 29.55 ac

Open Space:

6% of residential acreage (564 Ac x 6% = 34 Ac)

Green Valley Ranch Master Plan:

Neighborhood Park: (3 AC. Per 1000 Residents)

Required: 30.6 acres

Provided: 30.7 acres

Community Park: (1.1 AC. Per 1000 Residents)

Required: 11.23 acres

Provided: 6.6 acre cash-in-lieu payment made as part of amendment 1.

Remaining payment to be made by first residential plat of either PA 45-48.

Open Space: (7.8 AC. Per 1000 Residents)

Required: 79.7 acres

Provided: 94.9 acres

5. Adjustments

Does your current design require any ordinance waivers in order to be approved? If so, list each proposed waiver, and answer the following questions for each:

- What are the specific site-related characteristics of your site that have led to the waiver request? (Do not include self-imposed hardships or constraints as a justification. Financial constraints may be considered, but only as they relate to unusual site conditions. Do not simply respond that meeting all development standards would be too costly.)*
- What design alternatives have you considered to avoid the waiver? Why weren't these alternatives chosen?*
- What measures have been taken to reduce the severity or extent of the proposed waiver?*
- What compensating increases in design standards have you proposed to mitigate the waiver's impact?*

There are no adjustments being requested in the MP.

6. Required City Facilities

What additional city facilities or services will the City of Aurora have to provide in order for your MP to be implemented? What police, fire, and recreation facilities are required and where are they located (inside or outside your MP boundary.) To what extent will your development plan

help to fund or construct these facilities?

- As part of this Master Plan, the developer will be responsible for the construction of and/or funding of the roads and services prior to dedication to the City of Aurora. The City of Aurora will provide sewer and water services, police, fire, and library services. The City will also provide maintenance for public parks and public streets following dedication to the City. See Public Improvements Phasing Plan, Form J and the Development Agreement.
- A summary of the proposed water and sewer service strategy is contained in Form A. For additional detail, please refer to the Master Utility Plan and the Development Agreement.
- Picadilly Road, 56th Avenue and 48th Avenue are planned as six-lane Principal Arterials. 38th Avenue is planned as a four-lane Minor Arterial. 52nd Avenue, Tibet Road from 38th Ave to 48th Ave, and 38th Avenue are planned as three-lane collectors. 42nd Avenue is planned as a two-lane collector. Tibet Road from 48th Ave to 56th Ave is planned as a four-lane Minor Arterial. The arterials will require improvements based on City standards with development phasing. See Public Improvements Phasing Plan and the Development Agreement.

7. Vehicular Circulation

Do your proposed arterial and collector roadways align with the arterials and collectors of adjacent properties? Do your roadway cross-sections match adjacent cross-sections? If not, explain why.

- West of Picadilly, all roadways are within the City and County of Denver. The east half of Picadilly road and all roads to the east are within Aurora. Principal and Minor Arterials align to connect with the arterials to the north, south, east, and west. To the east, 48th Ave is aligned to connect with 48th Ave. in the approved Windler MP. Collectors in Aurora are spaced at half-mile intervals, but to the west in Denver, collectors are not spaced at the same interval. Due to the differences, the road alignments have been aligned to match existing roads within Denver.

See Street Cross Sections on Tab 10.14-10.15.

8. Pedestrian Circulation

Do off-street trails on your site connect with those on adjacent properties?

Do your cross sections match adjacent cross sections? If not, explain why.

- Off-street trails within Green Valley Ranch MP are aligned to connect with trails to the west in Green Valley Ranch Denver, including the one along the First Creek Drainage and along Tributary T near 48th Avenue. A community trail from the PA-16 open space will cross 52nd Ave via a grade separated crossing and extend north into PA-62 and the proposed active adult community. This will link the parks and amenities being provided to this community.
- Trail sections in Green Valley Ranch MP will be constructed to the City of Aurora standards and shall be constructed of concrete in the more urban areas of the community, and in the more natural areas, other materials, such as decomposed granite, may be proposed at the time of Site Plan review. Trails along drainage channels will be constructed according to maintenance road / trail standards of the Urban Drainage and Flood Control District and the P&OSD standards and will be a minimum of 10 feet wide. These trails shall both act as pedestrian trails and maintenance trails. Regional trails outside of the drainage ways will be ten (10) feet wide and community trails shall have a minimum width of eight (8) feet. Refer to the Open Space Plan for regional and community trail locations. Six (6) foot wide minimum neighborhood trails will also be incorporated into the trail network. These trail locations will be determined at Site Plan.
- The proposed Main Street in the commercial area will have a strong pedestrian connection across Tibet Road into the active adult community.

9. Protection of Natural Features, Resources and Sensitive Areas.

Describe how the development will be designed to protect, use or enhance natural resources and features. In particular, describe how the design of the development will respond to:

- *Water features, such as floodplains, streams, and arroyos.*
 - Open space is planned along the drainage corridors. This open space becomes part of the open space/trail network that crosses the site linking neighborhoods to parks, a school, and activity centers.
- *Adjacent parks and public open space*

- There are four (4) neighborhood parks within close proximity to the Open Space Corridor. This corridor begins south off-site from 38th Avenue and E-470 extending diagonally, towards 48th Avenue and Picadilly Road, within Green Valley Ranch. Two other neighborhood parks are along open space corridors in the active adult community and connect up to this main Tributary T open space.
- *Historic or archeological sites*
 - A review of the records of The Colorado Historical Society Office of Archaeology and Historic Preservation "Inventory of Cultural Resources" identified a number of items inventoried on the site, but none were found have significant historic or archaeological value.
 - The majority of these sites occur within the site's drainage areas, which will be enhanced as open space/trail corridors.
- *Significant views of the Front Range and views from public parks and I-70 and E- 470 and other collector and arterial streets*
 - Views from public parks and other collector streets west will be protected at strategic points within the development. The use of topography and vegetation will frame scenic vistas.
- *Riparian wildlife habitat*
 - There are no true riparian zones along the drainage. There is no flowing water or springs along the drainage, and no channels have developed.
 - Tributary T just east of Picadilly Road in Section 24 has one old mature cottonwood along the drainage corridors. This is also not a true riparian zone since there is no flowing water except after a storm, and there is no definite channel. The understory is an overgrazed pasture with no brushes or willow.
- *The approximate topographic form of major ridgelines and swales*
 - There are no major ridgelines or swales. The drainages will be enhanced as a part of the planned community's open space/trail network.
- *Natural or geologic hazard areas, including unstable slopes and expansive soils*
 - No geologic hazard areas or expansive soils have been identified on the site.

- Other natural features such as bluffs, ridges, steep slopes, stands of mature trees, rock outcroppings, or wetlands.
- Slopes over 6% are primarily found in the drainage areas that will be preserved/ enhanced as open space. There are no bluffs, ridges, or rock outcroppings. There are a few mature trees in and around the drainage areas that will be preserved to the extent possible within the open space areas.

10. Neighborhood Concept

Briefly describe the location of your individual neighborhoods. How have you defined the boundaries for each neighborhood? How are the architectural styles and other design features distributed among the neighborhoods? Are there any styles or other design standards that are restricted to specific areas?

The Green Valley Ranch Master Plan will be unified community. The architecture is defined by a mix of product types, which vary by location and quantity throughout the entire development which is split into Active Adult north of 48th Ave and a more Traditional neighborhood south of 48th Ave. When mixed together, these varying types create diverse neighborhoods in both style and affordability.

11. Black Forest Ordinance

Is the Black Forest Ordinance applicable to your site? If so where do the impacted areas show on your exhibits, and how will the requirements of the ordinance be carried out?

- The Green Valley Ranch site is outside of the Black Forest Ordinance jurisdictional area.

12. Steep Slope Standards

Does your development plan include building on areas with an existing slope of 6% or greater? If so, what standards and design strategies have you adopted to deal with drainage and aesthetic issues? Have you reviewed and considered our recommended steep slope design guidelines? If not, why?

- Slopes over 6% are primarily located in the drainage areas that are enhanced as open space.

13. Consultations with Outside Jurisdictions and Agencies

Have you consulted with representatives of your local school district, the Colorado Division of Wildlife, the Colorado Department of Public Health and Environment, or other applicable local, state or federal agencies? If so, list the dates, contact person, and results of your discussions. Include any letters you've received from these agencies as an appendix to your application.

- A number of meetings have been held between representatives of the applicant and the Aurora Public Schools to reach agreement on servicing the Green Valley Ranch Master Plan.
