

STERLING HILLS WEST

METROPOLITAN DISTRICT

Letter of Introduction

March 27, 202

Dear Sir or Madam:

On behalf of Sterling Hills West Metropolitan District, I am writing to request permission for the District to expand the playground area within the District's park, which is located at the intersection of East Lasalle Place and South Argonne St in Aurora, Colorado 80013 (approximate lat/long = 39.67209317492637, -104.76846846719212).

This project involves removing a section of the existing playground area's curb on the south side and constructing a new curb towards the southwest to enlarge the playground area. In the newly expanded area, a 3 station swing set will be installed and the new play area will be filled with safety mulch suitable for a swing set area. The entire project will comply with ANSI standard ASTM F1487-21 for public playgrounds.

Because the new swing set area will be an extension of the existing playground area, the new swing set area will comply with ADA 28 CFR 35.151 because disabled individuals will be able to access the entire expanded playground area by using the existing playground area's access ramp.

Sincerely,

Edward W Laves
District Manager
