Sign project: Prologis  
14209 East 35<sup>th</sup> Place  
Aurora, CO 80111

Hello,

We are looking to update the monument sign at 14209 East 35<sup>th</sup> Place to better coincide with our current brand standards. To do this, we are attaching .090 Aluminum panels to the front of the existing concrete monument and adding illuminated channel letters on top of the aluminum panels. We are also adding a 20' tall by 6' wide illuminated tower to the left side of the existing monument. With the placement of the tower, we will unfortunately have to remove the large pine tree that is butted up against the left side of the existing concrete structure.

Thank you,

Stephanie German
