Re: Pre-Submittal Meeting for LKQ Pull-N-Save

Scope of Work

Establish an approved site plan with future permitting/plans for installation of two 20' poles on which security cameras will be mounted to help combat extensive ongoing burglary, theft, and vandalism.

These cameras will be battery-powered (12V/DC batteries). The poles are lightweight and designed to fold down for easy maintenance without the need for equipment or additional staffing.

These cameras will have advanced analytic monitoring which will capture real time events and report these to the customer who will determine if law enforcement is needed to respond.

Sincerely,

Bobby Inabinet
Compliance Manager
