

Aurora Fire Station Fencing Project

City Project No: R-2287

Minor Site Plan Amendment – Letter of Introduction

Aurora Fire Station #14
22298 E. Aurora Pkwy
Aurora, CO 80016

February 23, 2024

To: City of Aurora Planning & Developmental Services

The Fire Station #14 site plan is being modified by adding new sections of 6 ft. tall ornamental metal security fence to connect to the existing fence and enclose part of the parking lot. Two automatic vehicular gates, gate operators, and access control hardware will provide secure entrances to the parking lot for personal vehicles and fire apparatus. Aurora Fire Rescue apparatus will also have remote controllers to operate the gates, which are equipped with 24-hour battery backup. One vehicle gate is a cantilever sliding type and the other is a vertical pivoting type; both are designed to comply with ASTM F2200, and the gate operators are UL 325 listed. Minor landscaping and concrete work will be done around the fence and gate locations.

The Fire Station #14 record site plan sheets have been updated with redlines to reflect the new work, and additional civil, landscape, and detail sheets are included in the submittal.

Please let me know if you have any questions or need additional information for this application.

Thank you!
