

SOLAR DECATHLON BLACKHAWK

SITE PLAN NOTES:

- The developer, his successors and assigns, including the homeowners or merchants association, shall be responsible for installation, maintenance and replacement of all fire lane signs as required by the City of Aurora.
- All signs must conform to the City of Aurora sign code.
- Right-of-way for ingress and egress for service and emergency vehicles is granted over, across, on and through any and all private roads and ways now or hereafter established on the described property. The undersigned does hereby covenant and agree that they shall construct upon the fire lane easements, as dedicated and shown here on, a hard surface in accordance with the City of Aurora's paving standards for fire lane easements, and that they shall maintain the same in a state of good repair at all times and keep the same free and clear of any structures, fences, landscape materials, snow or other obstructions. The maintenance of paving on the fire lane easement(s) is the responsibility of the owner, and the owner shall post and maintain appropriate signs in conspicuous places along such fire lane easements, stating "Fire Lane, No Parking." The local law enforcement agency(s) is hereby authorized to enforce parking regulations within the fire lane easements, and to cause such easements to be maintained free and unobstructed at all times for fire department and emergency apparatus use.
- The applicant has the obligation to comply with all applicable requirements of the Americans with Disabilities Act.
- The developer, his successors and assigns, shall be responsible for installation, maintenance and replacement of all landscaping materials shown or indicated on the approved Site Plan or Landscape Plan on file in the Planning Department. All landscaping will be installed prior to issuance of Certificate of Occupancy.
- All crossings or encroachments into easements and rights-of-way owned by the City of Aurora ("City") identified as being privately-owned and maintained herein are acknowledged by the undersigned as being subject to City's use and occupancy of said easements or rights-of-way. The undersigned, its successors and assigns, further agrees to remove, repair, replace, relocate, modify, or otherwise adjust said crossings or encroachments upon request from the City and at no expense to the City. The City reserves the right to make full use of the easements and rights-of-way as may be necessary or convenient and the City retains all rights to operate, maintain, install, repair, remove or relocate any City facilities located within said easements and rights-of-way at any time and in such a manner as it deems necessary or convenient.
- The approval of this document does not constitute final approval of grading, drainage, utility, public improvements and building plans. Construction plans must be reviewed and approved by the appropriate agency prior to the issuance of building permits.
- All building address numbers shall comply with the Aurora City Code, Chapter 126 - Article VII - Numbering of Buildings.
- All rooftop mechanical equipment and vents greater than eight (8) inches in diameter must be screened. Screening may be done either with an extended parapet wall or a freestanding screen wall. Screens shall be at least as high as the equipment they hide. If equipment is visible because screens don't meet this minimum height requirement, the Director of Planning may require construction modifications prior to the issuance of a permanent Certificate of Occupancy.
- Notwithstanding any surface improvements, landscaping, planting or changes shown in these site or construction plans, or actually constructed or put in place, all utility easements must remain unobstructed and fully accessible along their entire length to allow for adequate maintenance equipment. Additionally, no installation, planting, change in the surface, etc., shall interfere with the operation of the utility lines placed within the easement. By submitting these site or construction plans for approval, the landowner recognizes and accepts the terms, conditions and requirements of this note.
- Final grade shall be at least six (6) inches below any exterior wood siding on the premises.
- All interested parties are hereby alerted that this Site Plan is subject to administrative changes and as shown on the original Site Plan on file in the Aurora City Planning Office at the Municipal Building. A copy of the official current plan may be purchased there. Likewise, Site Plans are required to agree with the approved subdivision plat of record at the time of a building permit; and if not, must be amended to agree with the plat as needed, or vice versa.
- Errors in approved Site Plans resulting from computations or inconsistencies in the drawings made by the applicant are the responsibility of the property owner of record. Where found, the current minimum Code requirements will apply at the time of building permit. Please be sure that all plan computations are correct.
- All representations and commitments made by applicants and property owners at public hearings regarding this plan are binding upon the applicant, property owner, and its heirs, successors, and assigns.
- Architectural features, such as bay windows, fireplaces, roof overhangs, gutters, eaves, foundations, footings, cantilevered walls, etc. are not allowed to encroach into any easement or fire lane.
- In locations where utility easements overlap drainage easements, only subsurface utilities shall be permitted within the portion of the utility easement that overlaps the drainage easement. Installation of above ground utilities within a drainage easement requires prior written approval by City Engineer.
- Fire lane and handicapped parking signs, sign details, handicapped parking stall details, and locations shall be submitted and approved with the civil plans, "signage and striping" package. This sign package shall include all other signs as required by other city departments.
- In locations where utility easements overlap drainage easements, only subsurface utilities shall be permitted within the portion of the utility easement that overlaps the drainage easement. Installation of above ground utilities within a drainage easement requires prior written approval by City Engineer.

STANDARD NOTES

- SOIL FERTILIZER REQUIREMENTS SHALL BE DETERMINED BASED ON SOIL ANALYSIS TO BE DONE BY CONTRACTOR. IN SEED, SOD AND PLANTING AREAS APPLY THE EQUIVALENT OF A MINIMUM OF SIX CUBIC YARDS OF CLASS 1 COMPOST PER 1,000 SF.
- NEW VEHICULAR PAVING SHALL BE ASPHALT, SIDEWALKS SHALL BE CONCRETE.
- ALL UTILITY EASEMENTS SHALL REMAIN UNOBSTRUCTED AND FULLY ACCESSIBLE ALONG THEIR ENTIRE LENGTH FOR MAINTENANCE EQUIPMENT ENTRY.
- ALL LANDSCAPED AREAS AND PLANT MATERIAL, EXCEPT FOR NON-IRRIGATED, RESTORATIVE, AND DRYLAND GRASS AREAS THAT COMPLY WITH THE REQUIREMENTS FOUND IN SEC. 146-1429 AND/OR SEC 146-1435 MUST BE WATERED BY AN AUTOMATIC UNDERGROUND IRRIGATION SYSTEM. IRRIGATION SYSTEM DESIGN, INSTALLATION, OPERATION, AND MAINTENANCE SHALL CONFORM TO REQUIREMENTS FOUND IN THE CITY OF AURORA IRRIGATION ORDINANCE.
- MULCH ALL PLANTING BEDS WITH 3" DEPTH WOOD MULCH AROUND SHRUBS, AND 2" DEPTH WOOD MULCH AROUND PERENNIALS/GROUNDCOVERS/ORNAMENTAL GRASSES (NO WEED BARRIER FABRIC), EXCEPT WHERE NOTED. IN AREAS SHOWN TO BE MULCHED WITH COBBLE MULCH, DEPTH OF MULCH TO BE MINIMUM 8", PLACE OVER WEED BARRIER FABRIC. TREES IN LAWN & SEEDING AREAS SHALL BE MULCHED WITH 3" DEPTH OF WOOD MULCH.
- THE LANDSCAPE MATERIAL SHALL NOT BE PLACED OR KEPT NEAR FIRE HYDRANTS IN A MANNER THAT WOULD PREVENT SUCH EQUIPMENT FROM BEING IMMEDIATELY DISCERNIBLE. A 5-FOOT CLEAR SPACE SHALL BE MAINTAINED AROUND THE CIRCUMFERENCE OF FIRE HYDRANTS. LANDSCAPING MATERIAL SHOWN WITHIN THE SITE PLAN CANNOT ENCRUCH INTO ROADWAYS THAT ARE DEDICATED (OR DESIGNATED) AS FIRE LANE EASEMENTS (OR CORRIDORS).

IRRIGATION NOTES

- THE FINAL SYSTEM DESIGN SHALL COMPLY WITH ALL CITY OF AURORA'S REGULATIONS AND REQUIREMENTS.
- A RAIN SENSOR SHALL BE INSTALLED AS PART OF THE IRRIGATION SYSTEM, WITH AUTOMATIC SHUT-OFF OF THE SYSTEM DURING PERIODS OF HIGH MOISTURE.
- THE IRRIGATION SYSTEM SHALL INCLUDE AN IRRIGATION CLOCK WHICH ALLOWS PROGRAMMING TO MEET THE DIFFERENTIAL NEEDS OF THE SPECIFIED PLANTING PLAN.
- ALL SHRUB, ORNAMENTAL GRASSES AND GROUNDCOVER AREAS TO BE IRRIGATED WITH A DRIP IRRIGATION SYSTEM. IRRIGATED LAWN TO BE IRRIGATED WITH POP-UP SPRAY HEADS.
- SELECT DRIP EMITTER FLOW RATES TO MATCH WATER DEMAND OF EACH PLANT SPECIES.

ACCESSIBLE SIGN

SIGN SHALL BE CENTERED ON THE
PARKING SPACE

1. Signs shall be located at the right side of the fire lane entrance and at the end of the fire lane. The intermediate signs shall have double headed arrows pointing in both directions.
2. Typically, the maximum spacing of the fire lane signs is established at 100' on center with signs being placed on both sides of the fire lane easement (50' on center alternating sides). Where excessive curvature of the fire lane exists, the spacing of the fire lane signage will be increased as needed.
3. The signs shall be set at an angle of not less than 30 degrees and not more than 45 degrees with the curb or line of traffic flow.
4. Fire lane signs should be installed 2' behind curb or sidewalk.
5. The clearance to the bottom of the sign shall be 7 feet. There shall be not other signs attached to the sign or the sign post.
6. Placement of these fire lane signs cannot encroach into the 29' inside turning radius of the fire lane easement, obstruct any fire hydrant or fire department connection or encroach into the accessible route of the sidewalk area.
