RE: *CMRS DN90XCD10 Sprint PCS on Xcel Transmission Tower with coordinates of 39.577383 -104.707166*

Dear Mr. Osoba,

Hope all is well. Sprint PCS is seeking approval from the City of Aurora Planning Department to place a communications facility on the existing Xcel Transmission Tower at the above and attached location. . Sprint PCS proposes mount antennas on the existing transmission tower 15' below the lowest transmission line, with outdoor equipment cabinets placed on the ground at the base of the tower with a security fence. This location, site selection and design criteria all meet the requirements of the City of Aurora zoning code 146-1200 B and C by utilizing and existing structure to minimize the visual impact and adding additional towers. The ground base equipment will be fenced by a 6' cedar fence with CMU corners for stability.

Please feel free to contact me with any questions or required additional items.

Respectfully

Mark Paiz | 13845 West Atlantic Ave. | Lakewood, Co 80228 | 303.915.3428 – Direct Dial
