

EXAMPLE - The new vault will be similar as pictured but extend about 6-in above grade. The electrical and controls panels will be similar as pictured including the antenna ~30-ft. The area around vault will have evenly spaced bollards and will be unpaved, either with compacted gravel or non- irrigated landscaping. The new vault will be located south of Jewell Ave, behind the existing curbside landscaping, detached sidewalk, and a 20-foot landscape buffer. These street developments will be modified and installed by the MC LLC when they develop the site in the future. See below.

EXHIBIT 1 – E Jewell Ave
