**Re: E. 48<sup>th</sup> Avenue – ISP Amendment – Letter of Introduction –  
Amendment to REC NO 2023000060047**

Ms. Bickmire

This letter serves as an introduction to the E. 48<sup>th</sup> Avenue Infrastructure Site Plan Amendment. This project amendment is being submitted by Westwood Professional Services on behalf of the Windler Public Improvement Authority. The original ISP project included the construction of 6 lane arterial road from N. Tibet Road to the E-470 interchange project. This portion of arterial roadway contained storm sewer and water infrastructure to help support adjacent developments.

This amendment is proposing a revision to the median landscaping on the eastern boundary of the project. During construction, it was found that the E-470 interchange project had only pavement within their median, while our approved plans show landscaping within our portion of the shared median. No transition was originally planned between the two project's shared median. A 3' concrete landscape strip is being proposed the eastern boundary to help transition from the landscaped median within E. 48<sup>th</sup> Avenue to the fully paved median within the E-470 interchange project.

The submittal package enclosed with this letter includes the E. 48<sup>th</sup> Avenue revised ISP planset with rev clouded updates along with the completed Amendment Application. If you should have any questions regarding these documents, do not hesitate to contact me.

Regards,

Tom Odle
